

examined as well as the methods recited in the restriction requirement, because CCR5 is involved in these diseases, and these diseases have a close connection with each other.

Thus, it is respectfully submitted that the diseases recited in claim 1 and claim 2 are linked to form a single general inventive concept.

Regarding the species requirement, Applicants select the compound of formula (I), and the disease of graft-versus host disease and/or rejection reactions.

Favorable action on the merits is solicited.

Respectfully submitted,

Noboru TSUCHIMORI et al.
